## LUXURY LIGHTING

L'OFFICIEL

**Paola Napoleone** started making lampshades twenty years ago. It all started as a hobby with a very simple approach to the procedure and to the shape. Today Paola Napoleone has made of lampshades her business, becoming must-have sculptural objects due to their unique, highly geometric shapes and unconventional combination of colors.

### When and how did your passion for lampshades begin?

My passion for lampshades was born thanks to a close friend who made me discover this amazing world. Later on, during all these years, my passion grew and evolved thanks to my curiosity and manual skills.

**Your style has changed a lot in the last years: a continuous evolution that is still transforming. Where do you take your inspiration from? In which point do you decide which style you will follow?**

My style is the research of life in the shape and it expresses with colour and images. Shape and colour are the words that I use to invent a new lampshade. Like the wind moves the ears of wheat and recomposes them into undreamed of images, what I see and reproduce through my eyes is the origin of my style.
